15 Out Back

Buyer beware when it comes to food labels

Passage of federal legislation is good for co-op members

BY CHUCK SODERBERG

It's no secret that Washington politics have become so polarized that it can be tough for Democrats

and Republicans to come together to tackle challenges that their constituents face. But that's exactly what happened recently on Capitol Hill thanks to Iowa's congressional delegation.

Our senators and representatives listened to thousands of electric

cooperative stakeholders as they fought tirelessly to add important tax and retirement policies to the 2020 spending bill. The bill was signed into law before Christmas and included a provision known as the RURAL Act, which solved an existential issue for electric co-ops and America's rural communities.

Locally owned electric co-ops work to secure government grants to help pay for numerous activities that benefit the communities they serve. These include grants for storm recovery and mitigation, broadband deployment, renewable energy and economic development.

In order to maintain their taxexempt status, electric co-ops must receive no more than 15% of their income from non-member sources. Historically, government grants to cooperatives were counted as contributions to capital. But due to a glitch in the 2017 tax law, government grants were reclassified as income, pushing some co-ops beyond the 15% threshold and jeopardizing their tax-exempt status.

The tax problem left co-ops with a broad dilemma: Do they take the money they need to turn the lights back on for their members as quickly as possible after a disaster? Do they accept the broadband grants to help close the digital divide between rural and urban America? Or do they turn down those grants so they wouldn't have to spend critical funds when the tax bill comes due?

Had the unintended consequences

of the tax change been in place before 2018, some of Iowa's electric cooperatives may have experienced several instances where they would have lost their tax-exempt status for the year.

Thanks to Congress, electric co-ops across America won't have to make

those impossible choices. This is good news for both cooperatives and their member-owners because some co-ops may have had to raise their electric rates to pay new taxes.

On behalf of Iowa's electric cooperatives, we are extremely grateful to Sen. Joni Ernst, Reps. Cindy Axne, Abby Finkenauer, Dave Loebsack and Steve King for their support of the stand-alone RURAL Act. And without Sen. Chuck Grassley ensuring the provision was included in the final negotiations on the congressional budget bill, those painful scenarios would have begun to play out in co-op board rooms across the country. In standing up for Iowa's rural communities, they proved that Congress can still work for the people.

Notably, the legislation drew the bipartisan support of more than 350 of the 535 federal lawmakers. That's a rarity in Washington these days. In today's fast-paced society, pausing to give thanks is done with increasing rarity. That's unfortunate.

Thank you to all our federal legislators. Thank you for looking out for rural communities across Iowa and working with us to solve this problem.

Chuck Soderberg is the executive vice president and general manager of the lowa Association of Electric Cooperatives.

EDITOR'S CHOICE CONTEST

Win a Cuisinart Digital Glass Steamer

Electric cooperative members looking for a healthy way to cook will love Cuisinart's new Cook Fresh Digital Glass Steamer. A powerful system delivers steam from the top down, surrounding food to cook quickly and evenly. The 5-liter glass cooking pot is large enough for family-size portions of vegetables, fish, chicken, rice and more. For more information, visit https://amzn.to/35VWnRT. *\$*

Visit our website and win!

Enter this month's contest by visiting www.livingwithenergyiniowa.com no later than Feb. 29, 2020. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified. The winner of the Canon Photo Printer from the December issue was Martha Statlander from Franklin Rural Electric Cooperative.

LOCAL PERSPECTIVE

We love our community

BY KEVIN WHEELER

"To move forward, you have to give back."

This quote from Oprah Winfrey reflects the special bond and obligation that ties Access Energy Cooperative to the community we serve. With Valentine's Day approaching, we can't think of a better time to express how much we love this community and serving you, the members of the co-op.

We know when we helped to bring electricity to rural Iowa many years ago, the quality of life improved for all. Through the years, other issues needed to be tackled, and we have been at the forefront of helping to address some of those issues. We want to help meet the long-term needs of our community to ensure it continues to thrive – because just like you, we live here too.

While our top priority is to provide safe, reliable and efficient energy to you, equally important is our mission to enrich the lives of the consumermembers (that's you!) that we serve. This focus to benefit the larger community is central to the way we operate as a cooperative. Access Energy Cooperative knows that electricity is a critical need for modern-day life, but it takes more than poles and power lines to make a community.

Over time, our co-op has evolved to meet the changing needs of our community, thereby improving the quality of life for everyone. And that can mean many different things. It can mean programs for Iowa's youth, such as education scholarships or the electric cooperative Youth Tour, where we take our community's brightest young people to Washington, D.C., for a week-long immersion to experience democracy in action. It means annual contributions of approximately \$3,000 to RECare, a program that provides assistance to our local Community Action Agency. It means partnering with organizations for the betterment

of our communities. Over the last eight decades, our community-focused programs and

other giving projects have assisted our communities and members with many endeavors to make our communities a great place to grow and prosper – and we couldn't do any of this without you, our members.

We all benefit from these programs because of you

and your neighbors. You empower Access Energy Cooperative through your membership and through your participation in and support of these programs.

As a local business, we are proud to power your life and bring good things to our community.

We hope you will continue to guide our efforts by sharing your perspective as we plan for the future. The energy landscape is undergoing dramatic change fueled by evolving technology and consumer desires for more options. While the larger environment in which we operate is constantly changing, one thing remains the same. By working together, I'm certain that we can continue to do good things for our community. *f*

Kevin Wheeler is the general manager/ CEO for Access Energy Cooperative.

Tip of the Month

Are you using your fireplace efficiently? Remember to turn down the thermostat when burning a fire, and close the damper when a fire is not burning.

SMART MANAGEMENT. SMART LIFE. SMARTHUB

John Dvorak: Celebrating a career dedicated to cooperatives

When John Dvorak retires in March from his role with the Iowa Association of Electric Cooperatives (IAEC), people will miss his positive energy, knowledge and above all, his commitment to helping co-op employees go home safely each day.

For the past decade, Dvorak has served as IAEC's Director of Safety and Loss Control, working with electric cooperatives across the state to provide safety training and general work procedures training while promoting a proactive safety culture. Before joining IAEC,

Dvorak worked for Chariton Valley Electric Cooperative in south central Iowa for more than 30 years as a lineman and operations manager.

During his career, Dvorak has witnessed industry changes, technological advancements and an evolving safety culture. He is passionate about safety, and his enthusiasm is contagious. It's contributed to the depth of safety programs across Iowa and fostered a culture where employee and member safety is always the No. 1 priority for electric cooperatives.

We recently sat down with Dvorak, where he shared some of his career experiences.

C: Tell us about how your career started with Iowa's electric cooperatives.

A: I graduated from the Powerline Program at Northwest Iowa Community College in Sheldon and immediately started working for

Chariton Valley Electric Cooperative (CVEC) as a lineman, earning \$5.63 per hour. Coming out of school, my biggest fear was getting burned while working on power lines and equipment. Working in this industry can be unforgiving, and I was fortunate to have

mentors at CVEC who taught me to do things right the first time, even if it takes longer.

Q. You've worked a lot of long hours during storms and outages. What are some situations that stand out in your memory?

A: The coldest weather I ever worked in was a day with a windchill of 85 degrees below zero. Ice storms are long, tough days. During one of those storms, I once worked 42 hours consecutively and slept in coveralls at a hotel with no power for two nights. It's what we do, and it's in our DNA. Co-op members depend on us, and there

"Since John's first day at IAEC, his focus was to build on and improve the safety program for electric cooperatives and the members they serve. With John's leadership, the entire safety team has incorporated many new and innovative safety education and training ideas. His commitment and dedication have allowed us to emphasize the importance of safety and have taken the safety program to the next level. He has transformed IAEC's safety program and is leaving it in a better place than when he started. We are grateful for John's dedication to Iowa's electric cooperatives." is nothing cooler than restoring power and seeing the lights come back on. Working in the heat can be even worse. When I started, staying hydrated while working out in the sun with high heat and humidity was challenging. Today, there are products on the market, such as Gatorade, which are game-changers for this type of work.

Q: What is it like to be a lineman?

It's fulfilling work to A. know that we're helping to power homes and businesses that ultimately improve the quality of life in areas served by electric cooperatives. Line work is demanding on your body and family. The daily grind of climbing in and out of ditches, climbing poles and construction aspects take a toll over time. It can be worrisome for our families, knowing that severe injuries and fatalities are possible if we don't have our minds 100% on the task at hand. Through my role at IAEC, it's been gratifying to help linemen hone their safety skills and have a mindset of safety first.

Q: How has technology improved for line crews since your career started in the 1970s?

A: Technology has transformed • nearly everything from the trucks and equipment to the apparel linemen wear. On the jobsite, there are better warning devices, such as lights and alarms. The trucks are bigger with rotating and elevating buckets that extend farther to reach line equipment. Many of the boom and digger trucks are now fourwheel drive. We also have more computers and Automated External Defibrillators on the trucks. Hydraulic and battery-operated tools have improved the efficiency and effectiveness of the equipment. Technology has also improved

Chuck Soderberg, executive vice president and general manager, lowa Association of Electric Cooperatives

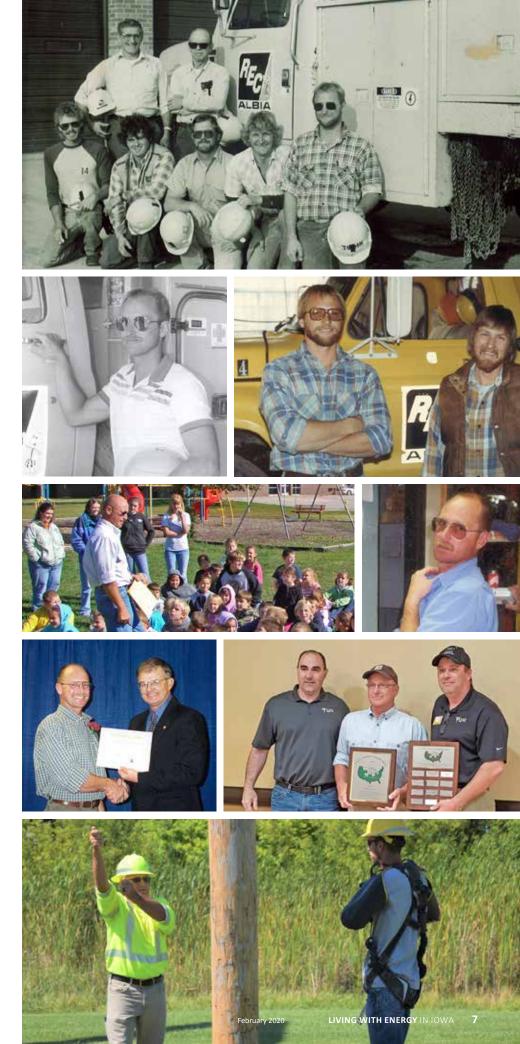

clothing with flame-retardant and high-visibility materials. Cell phones have drastically improved communication. From a power generation perspective, wind, solar, electric vehicles and battery technologies have emerged and will likely continue to change the energy landscape.

Q. What accomplishments are you most proud of in your role at IAEC?

Knowing that our training programs helped prevent an injury or saved a life is always at the very top of the list. In addition, I'm proud of developing the four-year linemen apprenticeship training program. The U.S. Department of Labor-certified program includes 7,000 hours of online and hands-on training, study and tests. We saw a need for this type of program for electric cooperatives in Iowa and worked to implement this rigorous training effort. Working on power lines is an unforgiving business and specialized training is needed. Today, almost every state has an apprenticeship training program.

In his retirement, it's unlikely the energetic safety leader will sit still for very long. His priority will be spending more time with his wife of 45 years, Linda – who was his high school sweetheart - and daughter, Kristine, and son, Aaron, along with their families. The first stop on the road to retirement, however, will be on sunny beach in Florida where he'll proclaim, "I made it!" And, he'll be right. John Dvorak always made it a better environment when he was around. Whether it was sharing his expertise, a smile or laugh, he has made Iowa's electric cooperatives safer and will be missed. 🗲

Heart-Healthy recipes we love

Tips from the American Heart Association

Grilled Basil Chicken and Zucchini

KNOW

YOUR SALT Sea salt is obtained directly through the evaporation of seawater. It is usually not processed and retains trace levels of minerals like magnesium, potassium and calcium. Table salt is mined from salt deposits and then processed to give it a fine texture. This processing strips table salt of any minerals. Both contain equal amounts of sodium.

S

۵

L A

ш

Т

ш

т

- 2 cups brown rice
- 1-2 limes
 - 2 garlic cloves
 - 1 tablespoon low-sodium soy sauce
- ¹/₂ teaspoon sugar
- 1 red chili
- 4 small zucchini
- 1 tablespoon olive oil
- 1/4 teaspoon black pepper
- 1 pound chicken
- 2¹/₂ cups of basil, roughly chopped

Cook rice per package instructions. Zest 1 lime into a large bowl, then squeeze in 2 tablespoons of lime juice. Grate garlic into bowl, then stir in soy sauce, sugar and thinly sliced red chili. Brush zucchini with olive oil and season with black pepper. Grill zucchini until just barely tender. Cook chicken until cooked through. Cut chicken and zucchini into pieces then toss in with sauce in a large bowl. Fold in basil and serve over rice with lime wedges.

Sue Nagel • Panora • Guthrie County Rural Electric Cooperative Association

Black Bean and Avocado Salsa

- 2 jalapeños (seeded for less heat)
- 1 clove garlic, diced or smashed
- ¹/₂ medium white onion, chopped
- ¹/₂ teaspoon salt
- 1/4 teaspoon pepper
- 1 can black beans
- 2 scallions, finely chopped
- 2 tablespoons fresh lime juice
- 1 tablespoon olive oil
- 1 avocado
- 1/2 cup fresh cilantro

In a large bowl, combine jalapeños, garlic, onion, salt and pepper. Add beans, scallions, lime juice and oil. Toss to combine. Fold in avocado and cilantro.

Dave Duit • Nevada • Consumers Energy

Granola Bar Bites

- 1¼ cup old-fashioned oats
- 1/2 cup creamy peanut butter
- ¹/₄ cup honey
- 1/3 cup mini chocolate coated candies
- 1/3 cup mini chocolate chips
- 2 tablespoons flax seed
- 1/4 cup coconut, optional

Combine all ingredients in a medium-sized bowl. Stir well until everything is coated. Roll mixture into small balls. Store refrigerated in an airtight container.

> Marie Pudenz • Carroll Raccoon Valley Electric Cooperative

Zesty Roasted Vegetables

- 1/2 pound mushrooms
- 1¹/₂ cups baby carrots
 - 1 medium onion, chopped
 - 1 large red, yellow or green bell pepper, cut into 8 strips
- **1⁄3** cup Italian dressing
- ¹/₃ cup Parmesan cheese, divided

Toss vegetables with dressing and ¼ cup of cheese. Spread in a 15x10-inch pan lined with foil and coated with cooking spray. Bake at 450 degrees F for 28-30 minutes or until vegetables are tender, stirring after 15 minutes. Sprinkle with remaining cheese.

> Bethany Van Wyhe • Lester Lyon Rural Electric Cooperative

1-2-3 Grilled Salmon

- ¹⁄₃ cup olive oil
- 3 tablespoons soy sauce
- 2 tablespoons Dijon mustard
- 1/2 teaspoon dried minced garlic
- 6 salmon filets (5 ounces each)

Combine the first four ingredients. Pour half into a large resealable bag, then add salmon and turn bag to coat. Refrigerate salmon for 30 minutes and refrigerate the unused marinade. Lightly coat a grill rack with cooking oil. Drain the salmon and grill over high heat for 5-10 minutes, or until fish flakes easily. Serve with the remaining marinade.

> Laura DeSmet • Larchwood Lyon Rural Electric Cooperative

Stir-Fry Vegetables

- 2 medium carrots
- 2 celery sticks
- 1 medium onion, thinly sliced
- 1 medium bunch broccoli, cut into pieces
- ¹/₂ pound fresh mushrooms, quartered
- 1/8 cup oil
- 1/4 cup water
- 1/2 teaspoon salt
- 1/2 teaspoon sugar

Cut carrots, celery crosswise, then lengthwise into matchstick thin strips. In a 12-inch skillet, heat oil and add carrots, celery, onion and broccoli. Stir quickly and frequently for about 3-4 minutes. Add mushrooms, water, salt and sugar. Cover and cook 5 minutes, stirring occasionally. Serve immediately.

> Penny Sue Haley • Keswick T.I.P. Rural Electric Cooperative

Spaghetti Chicken Bake

- 12 ounces thin spaghetti, cooked
- 4-5 chicken breasts, browned and diced
 - 1 jar pimento
 - 1 can mushrooms
 - 2 cups celery, diced onion, to taste
 - 2 cans fat-free, reduced sodium cream of mushroom soup
 - 1 can 98% fat-free cream of chicken soup
 - 2 cups shredded mild cheddar cheese

Mix ingredients together in a 9x13-inch pan and bake at 350 degrees F for 1 hour.

Ardine Dillingham • Hartley Osceola Electric Cooperative, Inc.

Creamy Broccoli Casserole

- 2 10-ounce packages frozen chopped broccoli, thawed and drained
- 1 can condensed low-fat, reduced sodium cream of chicken soup
- 2 teaspoons lemon juice
- 1/2 cup crushed seasoned stuffing
- 1 tablespoon reduced-fat margarine, melted
- 1/4 cup reduced-fat shredded cheddar cheese

Place broccoli in 8-inch square baking dish coated with non-stick cooking spray. Combine soup and lemon juice, pour over broccoli. Toss together stuffing and margarine then sprinkle over soup mixture. Cover and bake 350 degrees F for 25-30 minutes. Uncover, sprinkle with cheese, bake 5 minutes longer until cheese is melted.

> Cindy Briggs • Centerville Chariton Valley Electric Cooperative, Inc.

CHOOSE ი ს WISELY Read food nutrition labels. even for socalled "healthier foods. Choose the item with the шÌ lowest amounts of sodium, saturated fat, EAR. trans fat and added sugars.

AVOID ADDED SUGAR

Although sugars are not harmful in small amounts to the body, our bodies don't need sugars to function properly. Added sugars contribute additional calories and zero nutrients to food.

BODIES NEED FATS

Dietary fats are essential to give your body energy and to support cell growth. They also help protect your organs and help keep your body warm. Fats help your body absorb some nutrients and produce important hormones, too. Choose foods that provide good fats (monounsaturated and polyunsaturated fats).

S

TIP

HEART-HEALTHY

Opportunity of a lifetime: **WIN** a trip to Washington, D.C.!

Iowa's local electric cooperatives are just getting started on their selection process for high school sophomores, juniors and seniors from their areas to earn an all-expenses-paid trip for the June 18-25 Youth Tour to Washington, D.C. Unfortunately, there always are more qualified student candidates from these co-ops (as well as deserving students from co-ops that aren't participating in the Youth Tour program) than there are openings on the trip. However, one of those students, for the eighth year in a row, will have the opportunity to win a trip through the Living with Energy in Iowa 2020 Youth Tour Contest!

Of course, students at supporting co-ops first should apply for the Youth Tour through their electric co-ops. However, students can double their chances of winning a trip by entering the magazine's contest right after they enter the one for their electric co-op. More than 1,800 students from across America take part in the weeklong educational trip to the nation's capital. Participants will travel to Washington, D.C., meet their U.S. representatives and senators, and watch history come alive as they explore museums, memorials and monuments. They'll also meet student leaders from nearly every state and hear dynamic speakers during Youth Day. Best of all, students will make friendships that last a lifetime and become part of a group that has more than 50,000 alumni in every walk of life, including U.S. senators and CEOs. #

Official Contest Rules

The **2020 Youth Tour Contest** is open to any high school sophomore, junior or senior who's part of a member family of an Iowa electric co-op that's a member of the Iowa Association of Electric Cooperatives (IAEC). One all-expenses-paid trip will be awarded by *Living with Energy in Iowa* magazine, in addition to the trips sponsored by local electric cooperatives.

Students at supporting co-ops first should apply for the Youth Tour through their electric co-ops. Then, to enhance your chances of earning a trip, we encourage you to enter this contest, too. If you're chosen as the winner of a trip sponsored by your local electric cooperative, you'll become ineligible to win the trip sponsored by *Living with Energy in lowa* magazine.

To enter, you must submit an official entry

form plus a short (250-word maximum) essay in response to this statement: **Pick one of the seven cooperative principles and share how your local electric cooperative embodies it.** Entry forms are available at www.iowarec.org/youth-tour/living-withenergy-in-iowa-youth-tour-contest-form. You can submit your essay online at this address or email it to youthtour@iowarec. org. Entries must be received by April 6, 2020.

Living with Energy in Iowa magazine and IAEC staff will judge all essays anonymously. The decision of the judges will be final. **The winner of the** *Living with Energy in Iowa* **Youth Tour Contest will not be announced until April 15, 2020**, which is after all sponsoring local electric cooperatives have chosen their 2020 Youth Tour participants.

An Iowa student will earn a \$1,000 college scholarship, too!

During the 2020 Youth Tour this June, a student from each participating state will be chosen to serve on the national Youth Leadership Council (YLC).

Those students will return to Washington, D.C., in July to participate in leadership training and will be invited to attend the 2021 annual meeting of the National Rural Electric Cooperative Association in San Diego. As a bonus, the student chosen from Iowa will receive a \$1,000 college scholarship! This year, the Iowa Youth Tour director and chaperones will interview Iowa's YLC candidates on Saturday, June 20, during the Youth Tour.

Sarah Herz from Chariton Valley Electric Cooperative was the 2019 YLC representative from Iowa, and she'll be attending the annual meeting of the National Rural Electric Cooperative Association in New Orleans later this month. Read more on Page 14 about Sarah's experience on Youth Tour.

LOWA

Walking in footsteps of history while sightseeing, exploring and learning!

Youth Tour students can look forward to visiting these iconic places and taking part in some fun activities, which can only be found in our nation's capital:

- Albert Einstein Memorial
- Boat cruise on the Potomac River
- Ford's Theater
- Franklin Delano Roosevelt Memorial
- Holocaust Memorial
- International Spy Museum
- Iwo Jima Sunset Parade
- Korean War Veterans Memorial
- Lincoln Memorial
- Madame Tussauds Wax Museum
- Mount Vernon
- The National Mall
- U.S. Capitol tour
- Vietnam Veterans Memorial
- Washington Monument
- Washington National Cathedral
- White House
- World War II Memorial

2020 Iowa Youth Tour intern announced

Hollie Nelson has been selected as the Iowa Youth Tour intern for 2020. Hollie went on Youth Tour in 2018 as the winner of the *Living with Energy in Iowa* essay contest. Her family farms in Access Energy Cooperative's service territory.

When reflecting on her 2018 trip she says, "When I participated in Youth Tour in 2018 it was an eye-opening experience as I was able to see that my voice matters here in rural America. As a result of this trip, I have been more involved in organizations that help influence rules and regulations regarding agriculture. From this, I have seen what positive pressure on

elected officials can do for advocacy groups and specific demographics, for example, farmers." Hollie is in her second year of college studying agribusiness. Her plan is to ultimately graduate with a Bachelor of Applied Science – Agriculture, and then her goal is to gain employment with the National Resources Conservation Service.

These electric cooperatives are sponsoring the 2020 Youth Tour

All of the electric co-ops on this list are offering one or more all-expenses-paid Youth Tour trip this year, so check your co-op's website or call the office for more details.

IN THE COMMUNITY

CO-OP GOVERNANCE

Help others by contributing to RECare

RECare is a program where members help other members in need. You may make a one-time contribution to the RECare program, or you may enclose an amount each month with your monthly electric bill. Just one dollar a month will help others.

Last year, our members contributed \$2,937.53 to help others. This program is administered by the Iowa Community Action Program, and recipients must meet their guidelines. Funds are used to assist people in southeast Iowa. 🗲

To have an amount deducted from your monthly bill, send the form below to:

RECare c/o Access Energy Cooperative P.O. Box 440 Mount Pleasant, IA 52641

Board appoints nominating committee for election of directors

Your board of directors is elected by and from the membership of Access Energy Cooperative, and a nominating committee has been appointed to begin the process of selecting nominees to run for the three seats that will be up for election at the 2020 Access Energy Cooperative Annual Meeting of Members on Aug. 4.

Jerry

District 3

Barker

Holtkamp

David Hollingsworth

Each of our three districts will elect a director to fill a position for a term of three years. Terms that will expire

with this year's annual meeting to be held Tuesday, Aug. 4, are:

- **District 1:** David Hollingsworth
- District 2: Jerry Barker

District 3: Marvin Holtkamp In order to serve on the Access Energy Cooperative Board of Directors you must be a member of the cooperative and a bona fide resident of a premise served by the cooperative.

The following members have been appointed to the 2020 Nominating Committee:

District 1

- Brandon Ledger Stockport
- Kenneth Whitham Fairfield
- Joe Ledger Fairfield

District 2

- Bob Wilson Mt. Pleasant
- Randy White Mt. Pleasant
- Bob Scarff Mt. Pleasant

Electric cooperatives discuss important issues at legislative reception

Access Energy Cooperative's board members, along with other Iowa electric cooperatives, discussed priorities with state legislators and policymakers on Jan. 14 during the annual Welcome Back Legislative Reception in Des Moines.

In the coming months, the Iowa General Assembly will be addressing a multitude of issues, including items central to Iowa's rural economy. Electric cooperative directors, managers and staff are important advocates for a balanced approach in addressing energy issues allowing Iowa's member-owned electric cooperatives to continue providing safe, reliable, efficient and environmentally responsible power to more than 650,000 lowans. 🏂

Four tips for winter safety

BY ABBY BERRY

It's no surprise that winter months bring increased potential for fire risks and electrical safety hazards. This makes sense because during the coldest months, consumers are using additional electrical devices and appliances, like space heaters, electric blankets and portable generators.

The National Fire Protection Association estimates that 47,700 home fires occur each year in the U.S. due to electrical failure or malfunction. These fires result in 418 deaths, 1,570 injuries and \$1.4 billion in property damage annually. This winter, safeguard your loved ones and your home with these electrical safety tips from the Electrical Safety Foundation International.

SERVICE AWARDS

1 Don't overload outlets.

Overloaded outlets are a major cause of residential fires. Avoid using extension cords or multioutlet converters for appliance connections—they should be plugged directly into a wall outlet. If you're relying heavily on extension cords in general, you may need additional outlets to address your needs. Contact a qualified electrician to inspect your home and add new outlets.

- 2 Never leave space heaters unattended. If you're using a space heater, turn if off before leaving the room. Make sure heaters are placed *at least* three feet away from flammable items. It should also be noted that space heaters take a toll on your energy bills. If you're using them throughout your home, it may be time to upgrade your home heating system.
- 3 Inspect heating pads and electric blankets. These items cause nearly 500 fires every year. Electric blankets that are more than 10 years old create additional risks for a fire hazard. Inspect your electric blankets and heating pads – look for dark, charred or frayed spots, and make sure the electrical cord is not damaged. Do not place any items on top of a heating pad or electric blanket, and never fold

them when in use.

(4) Use portable generators safely. Unfortunately, winter storms can cause prolonged power outages, which means many consumers will use portable generators to power their homes. Never connect a standby generator into your home's electrical system. For portable generators, plug appliances directly into the outlet provided on the generator. Start the generator first, *before* you plug in appliances. Run it in a wellventilated area *outside* your home. The carbon monoxide it generates is deadly, so keep it away from your garage, doors, windows and vents. 🗲

Abby Berry writes on consumer and cooperative affairs for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives.

Youth Tour opened my eyes to the possibilities for the future

BY SARAH HERZ

Holding your phone, you have access to almost everything. You need a ride somewhere? Use the Uber passenger app. If you want to know more about the National Rural Electric Cooperative Association (NRECA), you can Google it. Do you need a flashlight? You can turn on the one in your hand.

You have a lot at your fingertips, thanks to electricity and technology. Without electricity, our lives would undoubtedly be different. I can't imagine not having my phone, laptop, hairdryer and curling iron, a washer and dryer, and more.

Thankfully, we had a group of people that supported rural electrification and invested in engineering and technology that allowed electricity to be more affordable for everyone. And here we are today – with much hard work in the intervening years.

Like those early days of people working together to bring electricity to rural areas, many things in life take working with others to get things done.

Every summer, my family gets together for the Fourth of July. One of our favorite jobs is making homemade ice cream. The kids are in charge! We mix up the ingredients, and we put it in an ice cream maker. I'm not talking about one of those easy electric ones. This is a dusty, rusty, hand-crank, only-off-the-shelf-once-a-year ice cream maker. Honestly, I think that is why all the adults put us in charge – they don't want to crank it.

Thankfully, we all take turns cranking the machine. After our hard work, we enjoy the ice cream. So, what do electricity and ice cream have in common?

It took a group of people working together to ensure rural America received electricity. In 1942, electric co-op leaders organized NRECA, so all cooperatives could have their

voices heard. It required cooperatives to work together, demonstrating one of the seven cooperative principles, "Cooperation Among Cooperatives." Whether it's electricity or ice cream, we can accomplish more when people work together.

When my electric cooperative selected me for Youth Tour, I didn't know what to expect. I had never been to Washington, D.C. I knew we would sightsee, meet youth representatives from other states and learn more about electric cooperatives. It was all of this and more.

I was struck by the amount of history associated with our nation's capital. Everywhere we looked, there were historical references. Monuments recognize the sacrifices made by members of the military and emphasize the principles our country was built on. Historical events are the groundwork for our future and can also be considered the steering mechanism.

When I read about NRECA's history, decisions made by many different government entities and groups of people working together set things in motion for where we are today. Remembering the past and recognizing the hard work of those before us gives shape to our future. As a young person, it is essential to remember to work together. By pulling together people of many talents, by incorporating engineering and technology, and by applying hard work and determination, industries such as the electric cooperatives will continue to grow and help our communities.

TOII

It's also important for me and others of my age to step up and be a part of that, be a leader, get involved, and make sacrifices that make a difference.

The Youth Tour opened my eyes to the possibilities. A once-in-a-lifetime opportunity that will influence my future decisions and career path.

America is the ice cream, and the crank is the hard work, determination and passion that you put into it. The result is always good. *F*

Sarah Herz was sponsored by Chariton Valley Electric Cooperative for last year's Youth Tour. She was selected as Iowa's 2019 National Youth Leadership Council representative.

See Pages 10-11 of this issue to learn more about the 2020 Youth Tour. Students – Enter for your chance to WIN an all-expensespaid spot on this year's trip.

Buyer beware when it comes to food labels

BY VALERIE VAN KOOTEN

Once again, I've been duped by food product labeling.

Okay, it's my own fault because I don't always read the labels closely enough, but can't a person pick up some pancake syrup without having to examine every aspect of the labeling?

It started a few years back when I grabbed a frozen roll of sausage from the store's cooler. Same brand I always buy; same colors on the package. When I fried it up and served it, Kent gave me a funny look. "What's wrong with this sausage?" he asked. It had a definite sweet taste to it.

I pulled the wrapper out of the trash and behold – mapleflavored sausage. Is there an actual market for this stuff? Evidently. But it won't be our household.

It happened again a few months later when there was cinnamon in my pancake syrup and club soda in my soft drink. It was obvious I was going to have to be more vigilant in my shopping, which takes place after work when I'm tired, hungry, crabby and ready to take off constrictive undergarments. Not exactly a situation conducive to be reading the fine print on every item I purchase.

But I persevered. It went well for a while – I congratulated myself for avoiding the lime chipotle in my ketchup and for steering clear of the dill pickles in my potato chips. In a moment of weakness, however, I slipped up and picked up "The Cereal."

The Cereal has become a shorthand name for the granddaddy of food mess-ups, so egregious that the mere mention of the phrase conjures up, in our household, a bad

decision of major proportions. The Cereal looked pleasant enough – nay, it looked identical to the nutty flakes I have purchased since college. But lurking beneath that packaged exterior lay a flotsam and jetsam unmatched by even the chocolate vampire-branded cereal I demanded as a kid – and then wouldn't eat.

My first thought on pouring it from the box was that it looked dark – really dark. It was too uniformly brown to think it was burned. Then I noticed the smell. Chocolate? Spices?

I pulled the box out and looked at it closely. "Whole grain fiber flakes with cinnamon and chocolate," the box proclaimed in tiny letters as if they were flouting their fraud. I groaned but poured milk on them. After all, I'd paid \$4.29 for the box, and I'm too Dutch to let them go bad. On first taste, I didn't need to "let them go bad." They were bad already. It was like eating shingles dusted with cocoa and cinnamon sugar. Dreadful.

It isn't just American brands that are putting together strange flavor combinations.

We've accidentally purchased shrimp-flavored "crisps," or potato chips, in England and foie grasflavored pasta in France.

So, back to The Cereal. Plan B is to throw them into some bars or cookies. Maybe I could throw the cinnamon pancake syrup in, too? *F*

Valerie Van Kooten is a writer from Pella who loves living in the country and telling its stories. She and her husband Kent have three married sons and two incredibly adorable grandsons. Nowadays, some of us take electricity for granted. But no matter where you go, you expect it to follow. And it does. It's there because your electric co-op is here.
